

COMMON RAIL INJECTORS CODES

When fitting a replacement SRT Automotive CR Injector with CODES, please pay attention to the process outlined below:

- Find the new CODE on the SRT Automotive label.
- Fit the injector on the engine according to the workshop manual instructions.
- With the help of the manufacturer's diagnostic equipment or equivalent, introduce the new CODE in the system before cranking the engine.
- Crank the engine and control the injector's functioning with the diagnostic equipment.

Note: Please bear mind if you decide to not follow these steps, SRT Automotive won't accept any claim during the warranty period.
