

BOSCH CP4 PUMPS CLEANING WARNING

When fitting a replacement BOSCH CP4 pump, please pay attention to the process outlined below. Failure to do so can cause breaks on the internal parts of the supplied pump and accordingly, breaks on all components of the diesel system and the engine. If the damage is caused by any break of the internal components of the CR pump or by using low or bad quality fuel, before fitting the supplied pump you must change the following components:

- Fuel tank.
- Fuel pipes and connections.
- Fuel filters.
- High pressure rail.
- Common Rail injectors.

Note: Please note that if you take the decision to do not follow these steps and damage in the supplied pump is occurred, SRT Automotive will not accept any claim during the warranty period.
